ROW Quarterly PM Workshop

Virgil Pridemore

November 6, 2018

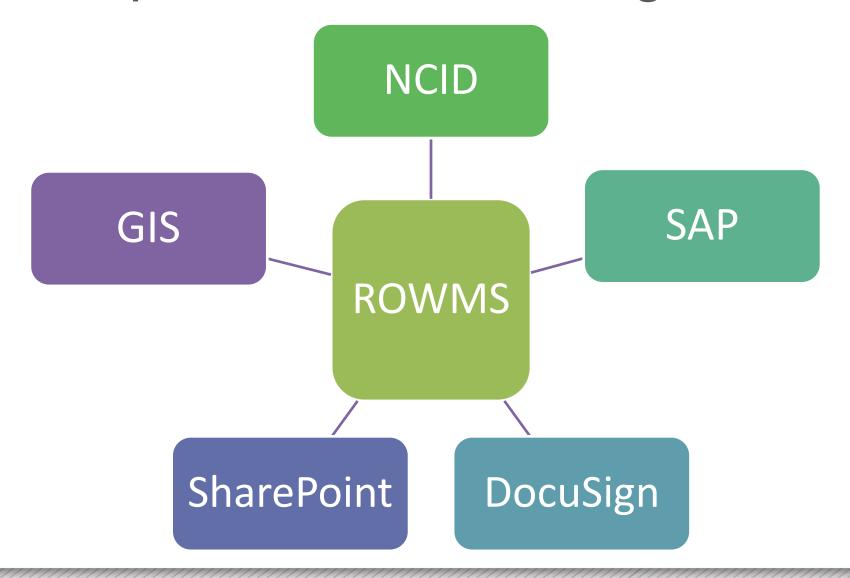

Overall Project Goal

To replace the current Right of Way System with a solution that captures Right of Way information and documents, provides workflow and reporting capabilities and interfaces with internal systems.

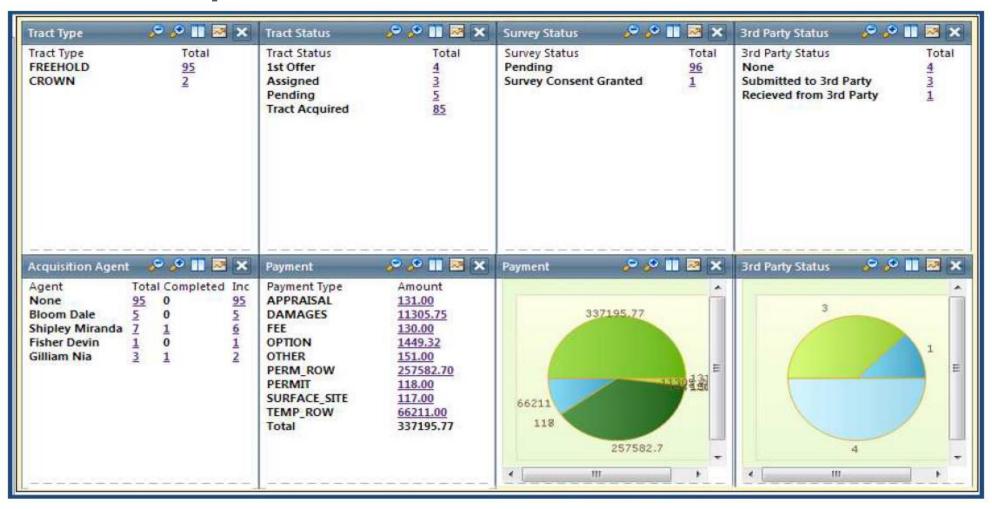

Key Business Goals

- Provide a single repository for all Right of Way data and documents;
- Standardize Right of Way processes;
- Reduce cycle times by 25% or more;
- Reduce data entry errors and duplicate data entry;
- Provide workflow capabilities and real-time alerts and notifications;
- Facilitate collaboration across the organization and integrate contractors into the Right of Way business process.
- Integrate with internal systems (GIS, SAP, SharePoint)

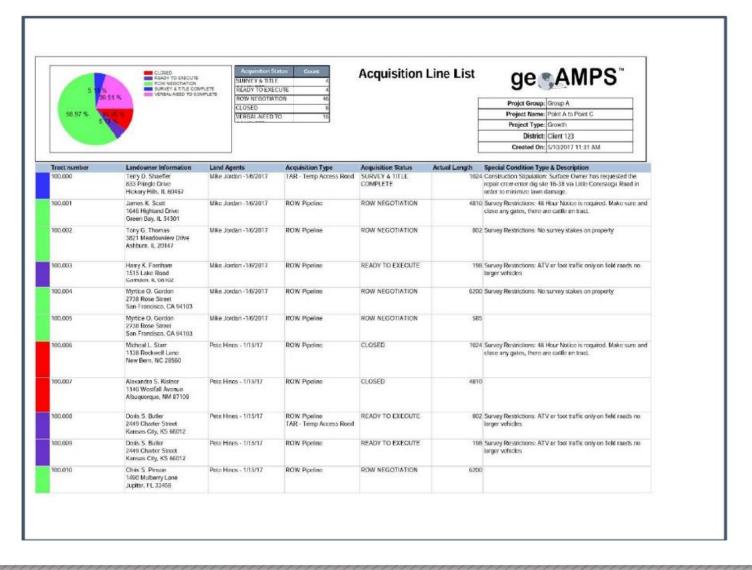

Proposed Solution Integration

Project Summary

Project	Right of Way Management System (ROWMS - ITP.00245)
NCDOT Business Unit	Right of Way
Contracted Vendor	geoAMPS - Land Rights & Infrastructure Asset Management Software
Description	Address the shortfalls of the legacy system and provide an end-to- end COTS solution that supports and facilitates standardization of ROW business processes.
Project Start Date	November 2013
Vendor On-boarded	February 2018
Current Project Phase	Planning and Design
Implementation Date	Tentative: 3 Rollouts 12/2019 – 3/2020

Project Budget

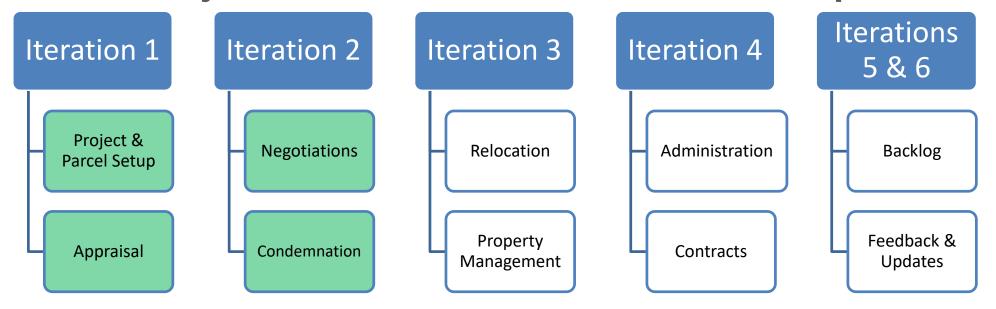

Overall Implementation Approach

Iterative
Configuration &
Customization
(6 Iterations)

Big Bang Delivery

3-Phase Rollout

Project Status and Next Steps

Status

Currently working with vendor through design and build stages for Iterations 1 and 2

Next Steps

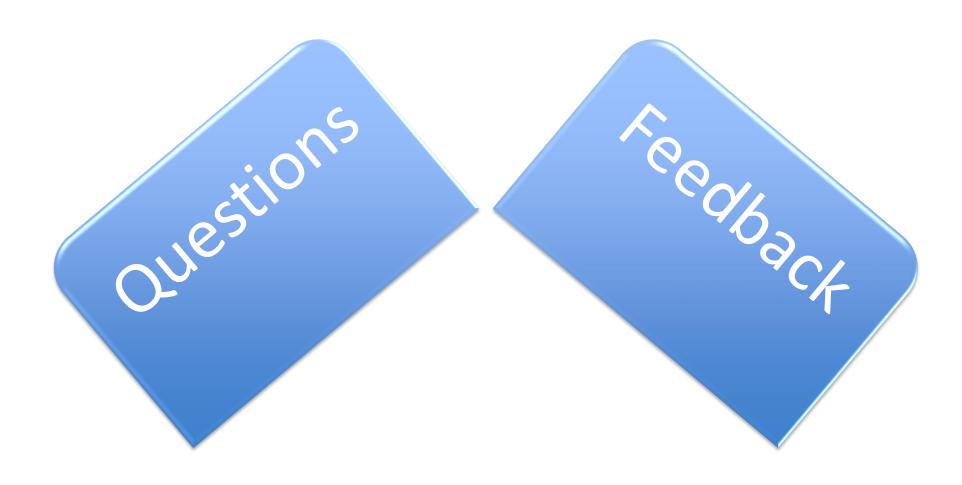

- Iteration 1: Dec 2018 / Jan 2019 User Functional Testing and System Integration Testing
- Iteration 2: Jan 2019/Feb 2019 User Functional Testing and System Integration Testing
- Iteration 3: Mar 2019 Begin configuration & customization

3-Phase Rollout

Rollout 1 Rollout 2 Rollout 3 Area 2 Area 1 Areas 3, 4, 5 **Appraisal Appraisal Appraisal Divisions Divisions Divisions** 7, 9, 10, 11 5, 6, 8 1-4 12, 13, 14
